PROFILE

Computer science professional with an MSc in Advanced Computer Science and hands-on experience since 2022 building and maintaining software and web applications. Skilled across Python, JavaScript/TypeScript, Java, C++ and PHP, with hands-on work in REST APIs, relational databases, containerised microservices, mobile apps and AI-assisted automation. Strong problem-solver seeking technology roles across software, web and AI.

EXPERIENCE

Head of Tech & Automation Solutions

AI Alchemy, United Kingdom | Present

- Own the technology behind an AI content-systems agency, covering automation workflows, funnels, content delivery and lead generation.
- Turn complex technology into reliable automation that keeps client operations running smoothly.
- Design, build and maintain the company's web platform, including its e-commerce shop, blog and integrations.

Web Developer

Elegance IT Solution, Dhaka, Bangladesh | Aug 2023 – Jul 2024

- Delivered bespoke client applications from requirements to release using PHP, JavaScript, HTML5 and CSS3.
- Built custom plugins and themes with hand-written, maintainable code.
- Worked directly with clients to gather requirements, act on feedback and deliver within deadlines.

Assistant Executive & Web Developer

Tritech Building Services Ltd., Dhaka, Bangladesh | May 2022 – Jun 2023

- Customised and extended PHP-based plugins and themes to company requirements.
- Maintained performance and security of the company platform, and ran test plans to find and fix bugs before release.
- Collaborated across teams to support business and technical goals.

SELECTED PROJECTS

- **AI-Powered Fitness Tracker** – Cross-platform Flutter app with a Python back end for workout tracking, 30-day challenges and progress analytics.
- **Music Library Management** – Full-stack application with a secure FastAPI and SQLAlchemy back end, MySQL database and React interface.
- **E-Commerce Microservice System** – Containerised platform (Docker, PHP, Flask, MySQL) with load balancing, caching and separate admin services.
- **Student Monitoring System** – Django and MySQL platform for tracking student attendance, grades and performance.
- **Android Applications** – Native Java apps (weather, calculator, to-do list) built with Android SDK and REST APIs.
- **Password Manager (C++)** – Command-line tool with authentication, encrypted storage and a password generator.

EDUCATION

2025 – Present
MSc Advanced Computer Science
University of South Wales, UK
Mobile application development, distributed computing

2018 – 2022
BSc Computer Science & Engineering
Independent University, Bangladesh

2014 – 2016
Higher Secondary Certificate (Science)
Rajbari Govt. College

TECHNICAL SKILLS

Languages
Python, JavaScript, TypeScript, Java, C++, PHP, Dart, SQL

Frameworks
React, Node.js, Django, Flask, FastAPI, Flutter, Bootstrap

Data & APIs
MySQL, SQLAlchemy, REST APIs, relational database design

Tools & DevOps
Git & GitHub, Docker, Linux, Android Studio, VS Code

Core CS
Object-oriented programming, microservices, distributed computing, mobile development

LANGUAGES

English – Fluent
Bangla – Native
Hindi – Conversational
